Anti-Human CDKN2A Antibody [KAA341_16A5]

Catalog No. KAA341M16A05C

Overview

Product name: Anti-Human CDKN2A Antibody [KAA341_16A5]
Antibody specificity: Cyclin-dependent kinase inhibitor 2A
Species reactivity: Human
Clonality: Monoclonal
Clone number: KAA341_16A5
Host / isotype: Mouse / IgG2a
Immunogen: Human CDKN2A peptide
Cross reactivity: Not tested
Kinetic characterization by BLI (biolayer interferometry): Not tested
Purification: Protein A purified from cell culture supernatants
Form: Liquid
Concentration: 1 mg/mL in phosphate buffered saline containing 0.09% preservative
Conjugation: Unconjugated

Shipping, storage and shelf life
- 3 months when stored at 2 to 8 °C
- 1 year when aliquoted and stored at -20 °C
- 3 years when aliquoted and stored at -80 °C

Note:
* The applications above have already been verified. The antibody may be suitable for additional applications.
* Optimal antibody concentrations for each application should be determined by the user.

Additional information

Target antigen
Protein name: Cyclin-dependent kinase inhibitor 2A
Gene name: CDKN2A
UniProt Accession: P42771
Organism: Homo sapiens (Human)

Product data

Immunohistochemistry
IHC-P analysis of human endometrium tissue by anti-human CDKN2A antibody (KAA341_16A5).

IHC-P was performed using sections of the formalin-fixed paraffin-embedded human endometrium tissue. Antigen was retrieved through addition of boiling Tris/EDTA buffer pH 9 in a pressure cooker for 3 min. Endogenous peroxidase activity was quenched by incubating the sections with 3% H₂O₂, for 30 min at room temperature. The sections were then incubated with anti-human CDKN2A primary antibody (KAA341_16A5) at 5 µg/mL at room temperature for 1 h. Poly-peroxidase conjugated goat anti-mouse IgG was used as the secondary antibody. Diaminobenzidine was used as the chromogen. The section was counterstained with hematoxylin. A tissue section incubated with phosphate-buffered saline followed by incubation with the secondary antibody was used as the background control.

Result: Glandular cells are positively stained at the cytoplasm and nuclei.
