Anti-Human F8 Antibody [K07001_3G9]

Catalog No. K07001M03G09C

Overview

Product name: Anti-Human F8 Antibody [K07001_3G9]
Antibody specificity: Coagulation factor VIII
Species reactivity: Human
Clonality: Monoclonal
Clone number: K07001_3G9
Host / isotype: Mouse / IgG2a
Immunogen: Recombinant human F8
Cross reactivity: Not tested
Kinetic characterization by BLI (biolayer interferometry): Not tested
Purification: Protein A purified from cell culture supernatants
Form: Liquid
Concentration: 1 mg/mL in phosphate buffered saline containing 0.09% preservative
Conjugation: Unconjugated

Shipping, storage and shelf life:
* 3 months when stored at 2 to 8 °C
* 1 year when aliquoted and stored at -20 °C
* 3 years when aliquoted and stored at -80 °C

Note:
* The applications above have already been verified. The antibody may be suitable for additional applications.
* Optimal antibody concentrations for each application should be determined by the user.

Additional information

Target antigen

Protein name: Coagulation factor VIII
Gene name: F8
UniProt Accession: P00451
Organism: Homo sapiens (Human)

Product data

Immunohistochemistry

IHC-P analysis of human stomach cancer tissue by anti-human F8 antibody (K07001_3G9).

IHC-P was performed using sections of the formalin-fixed paraffin-embedded human stomach cancer tissue. Antigen was retrieved through addition of boiling Tris/EDTA buffer pH 9 in a pressure cooker for 3 min. Endogenous peroxidase activity was quenched by incubating the sections with 3% H2O2 for 30 min at room temperature. The sections were then incubated with anti-human F8 primary antibody (K07001_3G9) at 5 µg/mL at room temperature for 1 h. Poly-peroxidase conjugated goat anti-mouse IgG was used as the secondary antibody. Diaminobenzidine was used as the chromogen. The section was counterstained with hematoxylin.

Result: Endothelial cells are positively stained at the cytoplasm.
