Anti-Human TOP2B Antibody [K70028_18F3]

Catalog No. K70028M18F03C

Overview

Product name: Anti-Human TOP2B Antibody [K70028_18F3]
Antibody specificity: DNA topoisomerase II beta
Species reactivity: Human
Clonality: Monoclonal
Clone number: K70028_18F3
Host / isotype: Mouse / IgG2a
Immunogen: Recombinant human TOP2B
Cross reactivity: Not tested
Kinetic characterization by BLI (biolayer interferometry): Not tested
Purification: Protein A purified from cell culture supernatants
Form: Liquid
Concentration: 1 mg/mL in phosphate buffered saline containing 0.09% preservative
Conjugation: Unconjugated

Shipping, storage and shelf life:
* 3 months when stored at 2 to 8 °C
* 1 year when aliquoted and stored at -20 °C
* 3 years when aliquoted and stored at -80 °C

Note:
* The applications above have already been verified. The antibody may be suitable for additional applications.
* Optimal antibody concentrations for each application should be determined by the user.

Additional information

Target antigen:
Protein name: DNA topoisomerase II beta
Gene name: TOP2B
UniProt Accession: Q02880
Organism: Homo sapiens (Human)
**Immunohistochemistry**

IHC-P analysis of human tonsil tissue by anti-human TOP2B antibody (K70028_18F3). IHC-P was performed using sections of the formalin-fixed paraffin-embedded human tonsil tissue. Antigen was retrieved through addition of boiling Tris/EDTA buffer pH 9 in a pressure cooker for 3 min. Endogenous peroxidase activity was quenched by incubating the sections with 3% H₂O₂ for 30 min at room temperature. The sections were then incubated with anti-human TOP2B primary antibody (K70028_18F3) at 2 µg/mL at room temperature for 1 h. Poly-peroxidase conjugated goat anti-mouse IgG was used as the secondary antibody. Diaminobenzidine was used as the chromogen. The section was counterstained with hematoxylin. A tissue section incubated with phosphate-buffered saline followed by incubation with the secondary antibody was used as the background control.

Result: Virtually all cells are positively stained at the nuclei.
