Anti-Human BANK1 Antibody [K92023_4B5]

Catalog No. K92023M04B05C

Overview

Product name: Anti-Human BANK1 Antibody [K92023_4B5]
Antibody specificity: B cell scaffold protein with ankyrin repeats 1
Species reactivity: Human
Clonality: Monoclonal
Clone number: K92023_4B5
Host / isotype: Mouse / IgG1
Immunogen: Recombinant Human BANK1
Cross reactivity: Not tested

Purification: Protein A purified from cell culture supernatants
Form: Liquid
Concentration: 1 mg/mL in phosphate buffered saline containing 0.09% preservative
Conjugation: Unconjugated

Shipping, storage and shelf life:
- 3 months when stored at 2 to 8 °C
- 1 year when aliquoted and stored at -20 °C
- 3 years when aliquoted and stored at -80 °C

Applications

Note:
* The applications above have already been verified. The antibody may be suitable for additional applications.
* Optimal antibody concentrations for each application should be determined by the user.

Additional information

Target antigen
- Protein name: B cell scaffold protein with ankyrin repeats 1
- Gene name: BANK1
- UniProt Accession: Q8NDB2
- Organism: Homo sapiens (Human)
**Immunohistochemistry**

IHC-P analysis of human tonsil tissue by anti-human BANK1 antibody (K92023_4B5).

IHC-P was performed using sections of the formalin-fixed paraffin-embedded human tonsil tissue. Antigen was retrieved through addition of boiling Tris/EDTA buffer pH 9 in a pressure cooker for 3 min. Endogenous peroxidase activity was quenched by incubating the sections with 3% H$_2$O$_2$ for 30 min at room temperature. The sections were then incubated with anti-human BANK1 primary antibody (K92023_4B5) at 7.5 µg/mL at room temperature for 1 h. Poly-peroxidase conjugated goat anti-mouse IgG was used as the secondary antibody. Diaminobenzidine was used as the chromogen. The section was counterstained with hematoxylin. A tissue section incubated with phosphate-buffered saline followed by incubation with the secondary antibody was used as the background control.

Result: Non-germinal center cells and a few of germinal center cells are positively stained at the cytoplasm and membrane.
